ABOUT US

KT Technology is a premier supplier of self service kiosk terminals, with a global network of partnerships and value added resellers we are able to reach out to all four corners of the globe and offer local sales and support. Headed up by its main offices in both London and Hong Kong, KT has grown exponentially since its started back in 2005 to become a leader of well crafted quality manufactured kiosk terminals.

COMPANY PHILOSOPHY

We strive to be inspired and innovative within are specialist range of knowledge of manufacturing kiosk terminals,, the basis of each product is to ensure a robust, functional, aesthetical design which should remain key to each product foundation and maintain a competitive advantage by offering a flexible approach to integration and customisation of each customer terminal while still managing a pricing policy which can be still remain competitive globally.

PRODUCT DEVELOPMENT

KT has since its humble beginnings grown to extend its kiosk product line to encompass a complete line of self service hardware solutions, and with one of the most varied product lines available KT is confident that it is able to fulfil the business needs of its clients base. KT has several engaging industrial kiosk designers which assist clients wishes for customisation of there needs, including full on custom designing if we can't source a standard design already in production.

PRODUCT DEVELOPMENT

A Local But Global Network

KT has currently local offices situated in North America, Europe and Asia, and with its growth and expansion of partnerships we are able to extend local product assistance right from Sydney, Australia and right across the globe to the Americas, we work within all time zones fulfilling the needs of an ever expanding customer base of satisfied customers.
